

Typography & Text Formatting

Every text formatting option supported by the markdown parser.

Star markers

Regular text, no formatting.

Bold text via double stars.

Italic text via single star.

Bold and italic via triple star.

Underscore markers

Bold text via double underscores.

Italic text via single underscore.

Bold and italic via triple underscore.

Strikethrough

~~This text is struck through~~ - deprecated value.

Mixed inline

The **Q4 revenue** grew by 32% year over year, with **record margins** in all segments.

~~Previous guidance~~ has been revised upward.

Use **bold** for key terms, italics for titles, and ~~strikethrough~~ for retracted values.

LaTeX & Math Formulas

Formulas inside ... (inline) and ... (block) are parsed and converted to readable text. Greek letters and most math symbols require a Unicode font registered on the document; with standard built in fonts only Latin 1 characters render correctly.

Superscripts (Latin 1 safe)

Pythagorean theorem: $a^2 + b^2 = c^2$

Energy mass equivalence: $E = mc^2$

Cube: $x^3 - y^3 = (x - y)(x^2 + xy + y^2)$

Operators (Latin 1 safe)

Arithmetic: $a \times b$, $a \div b$, $a \pm b$, $a \cdot b$

Negation: $\neg p$

Fractions and roots

Quadratic formula: $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$

Golden ratio: $\phi = \frac{1 + \sqrt{5}}{2}$

Combined markdown and LaTeX

The **energy mass equivalence** $E = mc^2$ is one of the most famous equations in physics. Einstein derived it from special relativity ($v \leq c$).

A quadratic $ax^2 + bx + c = 0$ has discriminant $\Delta = b^2 - 4ac$.

Layout Engine

Flow containers stack children vertically. Flex containers distribute children along a row or column with alignment and gap controls.

Flow layout (vertical stack, gap: 8)

First item in the flow container.

Second item - stacked below with an 8pt gap.

Third item - the gap is consistent between all children.

Flex row - justify: space-between

Revenue	\$128,400	+14.3%
---------	-----------	--------

Flex row - justify: space-evenly, align: center

Q1	Q2	Q3	Q4
----	----	----	----

Nested containers (flow inside flex row)

Left column Flow layout inside a flex cell. Third line of text here.	Right column Also flow layout. Independent sizing.
--	--

Table

Name	Role	Status
Alice Nguyen	Lead Engineer	Active
Bob Chen	Designer	Active
Carol Smith	Product Manager	On leave
Dave Kim	Data Scientist	Inactive

Z Index, Parent Child & Explicit Positioning

Elements own child elements rendered on top of them, positioned relative to the parent's top left corner. Z index controls draw order within the same parent.

Rect with text child (padding: 12)

This text is a child of the rect - rendered on top, padded by 12pt.

Z index layering, draw order is z=0, z=1, z=2 regardless of declaration order

Multi layer card, title, subtitle, and badge are children of the background rect

Q4 2025 Report

Revenue exceeded projections by Delta = 14.3\%.
